

Scotland Independence Poll

Fieldwork dates: GB **Interview Method:** Online

Population sampled: All Scottish adults aged 16+ years

Fieldwork dates: 11-14th August 2014

Sampling Method: A demographically representative sample of Scots were invited to participate on the survey, with sample selected invited to participate in proportion to population distribution across Scotland and to specific demographics including gender and age.

Sample size: 1,005 adults aged 18+

Data weighting: Data were weighted to the profile of all Scottish adults aged 16+. Data were weighted by sex, age, social grade and region. Targets for the weighted data were derived from Census 2011.

Past Vote Weighting: However, after demographic weighting the declared past votes of the sample may not exactly match the results of the last election (Scottish Parliament 2011 election - first Constituency vote), which implies some kind of *political imbalance* may still be present in the contacted sample, even if demographic balance is deemed to be good.

As a result, we have taken the declared past votes on this new poll – including not voting at all in the 2011 Holyrood election – and added this information to all recent similar polls we have conducted in Scotland which contain the same question (recall of past vote to the 2011 Scottish Parliament election).

ICM compares non-voting (plus DK/Refuse) and the declared past votes derived in each poll to the actual result of the last Scottish Parliamentary election and gives a weight of 80% to the results of that election and 20% to the average of the most recent polls. This makes some allowance for people who genuinely misremember how they previously voted.

Questions: The computer tables attached in PDF format show each question, in full, in the order they were put to respondents, all response codes and the weighted and un-weighted bases for all demographics and other data including but not limited that published.

SCOTLAND INDEPENDENCE REFERENDUM POLL 9

Fieldwork : August 2014

Absolutes/col percents

Table 1

Q.1A As you may know, a referendum on independence will be held in Scotland on 18 September 2014. Some people have said they would not vote in that referendum, while others have said they would vote. How certain it is that you would actually vote in the independence referendum on 18th September?

On a ten point scale if 10 would mean you would be absolutely certain to vote and 1 would mean you would be certain not to vote how likely is it that you would cast your vote?

Base: All respondents

	Gender			Age						Work status						Social grade

Table 22

Q.10 For each of the following statements, please tell me whether you agree or disagree

SUMMARY

Base: All respondents

	In recent weeks, I have had lots of conversations with friends and family about the independence referendum	Members of my family have different views on whether Scotland should be independent	Some of the conversations about Scottish independence I have had with friends and family have ended in a row	In my experience, people are much more interested in the debate about independence than they ever are in what the parties have to say at election time	Whichever way the referendum goes, Scotland will be left badly divided after the 18th September

	1	1	Q.1A As you may know, a referendum on independence will be held in Scotland on 18 September 2014. Some people have said they would not vote in that referendum, while others have said they would vote. How certain it is that you would actually vote in the independence referendum on 18th September? On a ten point scale if 10 would mean you would be absolutely certain to vote and 1 would mean you would be certain not to vote how likely is it that you would cast your vote?	Base: All respondents	1005
