

## ICM Poll for BBC Wales

**Fieldwork dates:** 17-21<sup>st</sup> February 2017

**Interview Method:** Telephone.

**Population effectively sampled:** All adults aged 18+ in Wales

**Sampling Method, RDD:** A random sample of telephone numbers was drawn from the entire BT database of domestic telephone numbers in Wales. Each number so selected had its last digit randomised so as to provide a sample including both listed and unlisted numbers.

**Sampling Method, Mobile RDD:** A random sample of mobile telephone numbers was generated in proportion to network provider market share. As with the landline process, seed telephone numbers are used to create the mobile RDD sample by randomising the last N digits of the seed number.

**Sample size:** 1,002

**Data weighting:** Data were weighted to the profile of all Wales adults aged 18+ (including non telephone owning households). Data were weighted by sex, age, social class, household tenure, work status and region. Targets for the weighted data were derived from the National Readership survey, a random probability survey comprising 36,000 random face-to-face interviews conducted annually.

**Questions:** The computer tables attached in PDF format show each question, in full, in the order they were put to respondents, all response codes and the weighted and un-weighted bases for all demographics and other data including but not limited that published .

**Further enquiries:** [martin.boon@icmunlimited.com](mailto:martin.boon@icmunlimited.com)

**British Polling Council:** ICM is a member of the British Polling Council and abides by its rules. <http://www.britishpollingcouncil.org/>

**Q7. To maintain the current level of care and services provided by the NHS, funding for the NHS would have to increase. I am now going to read out some suggestions people have made about how funding could increase. With that in mind, how acceptable or unacceptable do you feel each of the following measures would be?**

**Summary Table****Base: All respondents**

	Charging for some health services that are currently free	Charging patients who have diseases and illnesses which are caused in some way by their lifestyle	Increasing income tax	Increasing National Insurance	Increasing charges for visitors from outside the United Kingdom for health services they receive from the NHS	Moving to a type of insurance model for NHS funding	Charging patients for missed appointments (for example GP or hospital appointments)
