

The Guardian – July 2017 poll

Fieldwork dates: 14-16th July 2017

Interview method: Online

Population effectively sampled: All GB adults aged 18+

Online Sampling Method: A nationally representative sample was selected at random from the NewVista panel of 200,000+ adults, with sample selected in proportion to population distribution.

Sample size: 2,046 GB adults aged 18+

Data weighting: Data were weighted to the profile of all adults aged 18+. Data were weighted by sex, age, social class, household tenure, work status and region. Targets for the weighted data were derived from the National Readership survey, a random probability survey comprising 36,000 random face-to-face interviews conducted annually.

Further weighting schemes were overlaid as follows:

Weighting by past votes – online

The sample were fully weighted to the 2017 General Election result, with provision made for Did Not Vote, Refusal and Don't know.

Weighting for turnout

We have returned to the simple 10-point turnout scale, applying a factor to each score given out of 10, halved if the respondent did not vote in the previous election.

Voting intentions: ICM derives vote intentions from three questions.

First of all respondents are asked if they are registered to vote in UK elections. Those not registered are excluded from vote intention calculations.

Then, respondents are asked how likely it is that they would be to go and vote in a new election. Those who say they will vote are asked to say which party they would support in a new election.

Respondents are then asked whether they voted in 2017 and which party they voted for in that election.

The vote figures shown in the tables are calculated after ICM has excluded those who are not registered, say they will not vote, refuse to answer the question or don't know who they would vote for (but see below).

Adjustment process 1: 'Partial Refuser' Reallocation

- A.) 75% of 2015 Conservative, Labour and Liberal Democrat voters who refuse to answer the vote intention question or say they don't know, are added back to the party they voted for in 2017.
- B.) 25% of 2017 voters for all other parties who refuse to answer the vote intention question or say they don't know, are added back to the party they voted for in 2017.

Adjustment process 2: 'Total Refuser' Reallocation

'Total refusers' are people who refuse/DK their future vote intention AND also refuse/DK who they voted for in the previous General Election (2017).

Our new adjustment reallocates some Total Refusers back into the poll sample. This is achieved in the following way:

1. The number of Total Refusers on any poll is multiplied by the proportion of Partial Refusers who were (already) re-allocated in Adjustment Process 1. (For example, if 60% of Partial Refusers were added back, then 60% of Total Refusals will be added back).
2. Total Refusers are then multiplied by each party's share of reallocated Partial Refusers. (For example, if 40% of already allocated Partial Refusals were 2017 Conservative voters, then 40% of remaining Total Refusals will be reallocated to the Conservatives).

Questions: The computer tables attached in PDF format show each question, in full, in the order they were put to respondents, all response codes and the weighted and un-weighted bases for all demographics and other data including but not limited to that published.

Table 4

Data derived from:-

Q.A Some people have said they would not vote in a new General Election, while others have said they would vote. How certain is it that you would actually vote in a general election if it were to be held tomorrow? On a ten point scale where 10 means you would be absolutely certain to vote and 1 means you would be certain not to vote how likely is it that you would cast your vote?

Q.B The Conservatives, Labour, the Liberal Democrats, UKIP, and other parties would fight a new General Election in your area. If there were a General Election tomorrow which party do you think you would vote for?

Data excludes those who definitely will not vote (5%), don't know who they would vote for (13%) or refuse to answer (1%)
