**Q2. Some people have said they would not vote in a new General Election, while others have said they would vote. How certain is it that you would actually vote in a general election if it were to be held tomorrow? On a ten point scale where 10 means you would be absolutely certain to vote and 1 means you would be certain not to vote, how likely is it that you would cast your vote?**

**Scenario One: In the parliamentary vote, the Labour Party, including your local MP, decided to vote against the Government's final Brexit deal, and so did the Liberal Democrats and Plaid Cymru.**

**Q9. Continue to imagine the current situation is that the UK Government has agreed a final Brexit deal with the EU and that the UK Parliament has voted on the deal.**

**Some people argue that there should be a 'People's Vote' on the Government's final Brexit deal following the deal passing through Parliament.**

**This would give voters the opportunity to accept or reject the deal. Now please consider the following two scenarios and, all other things being equal, tell us which party you would vote for in a general election held at this time if...**

**Scenario Two: In the parliamentary vote, the Labour Party, the Liberal Democrats and Plaid Cymru decided to support the Government's final Brexit deal, on the condition that there is a People's Vote on the deal and that the deal is then approved by the public in this People's Vote.**

**However, your local MP defied the Labour leadership and voted with the Government, in favour of the final Brexit deal and against a People's Vote.**
